Reception Online Health Assessment – January 2019

Dear Parent/Carer,

Now that your child has started school I would like to welcome you to the school nursing service, which is here to support you with the care of your child up to the age of 19.

To assist us in giving you the correct support that you and your child need, we would like you to complete an online health assessment of your child, which is in line with government directives. This enables us to respond to any identified health needs of your child. Further assessments will be offered to children in year 6 and year 9.

The online health assessment asks about several aspects of your child's life that can impact on their health such as lifestyle and behaviour. This enables our skilled team to make an assessment of your child's needs. We may then contact you to discuss your concerns and offer support and advice in areas you identify.

The assessment is confidential between you and the school nurse team, and if necessary we can undertake further assessments and refer you and your child to other specialist children's services. There is further information on our website about the services we offer:

<https://www.hct.nhs.uk/our-services/school-nursing>

Although anonymous information may be shared, (for example information about lifestyle choices and behaviour) with other agencies to improve services, all personal information collected from this questionnaire will be treated as confidential and held securely to meet with data protection requirements.

The assessment can be completed from 1st January 2019 and we would ask you to complete by Friday 15th February to enable us to assess any needs your child may have.

To access the online questionnaire please follow the link below:
